

# Digital Citizenship Tip of the Month

Now that school is really going and students are working hard to complete projects and assignments, it is a great time to remind them about Copyright and Fair Use. Because of the ease of making a digital copy, students may not realize what the rules are about reusing digital content from someone else. These can include:

- Getting permission to use copyrighted material.
- Using proper citations so the person who originally created the content can get credit.
- Don't take credit for something that someone else created, which would be plagiarism.

For those who want to go more in-depth with their students, there are excellent lessons on this subject in 2nd and 4th grade Digital Citizenship curriculum that can be found here:
